{ RECYCLED }

## new old jewels

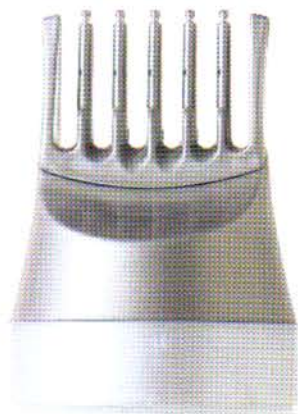

Recycled and natural materials lend these two hot jewellery lines an organic, heirloom feel.

Designer Sally Han scours flea markets and antique shops to source materials for her jewellery line **Psalms 91:1 Accessories**. We love the mismatched chandelier earrings and button jewellery (inspired by her father's button business). Her latest collection, Himba, is made by women in Namibia, who receive all the proceeds. **Surevolution** works with artisans around the world to merge traditional techniques with today's style. We are especially fond of leaf collection made by a Colombian artist, from leaf dipped in metal.

{ KIND COLOUR }

## got 10 mins?

Colour your hair at home thanks to an innovative new ingredient and a special comb that makes it super easy to distribute the colour. **Bonus:** The lower pH means less damage to hair, and it protects against damage from free radicals formed during the colouring process.

PERFECTIO BY NICE 'N EASY.
